EDUCATION

California State University – Long Beach

Bachelor of Science in Computer Science, AI/ML Track

Long Beach, CA

Aug. 2023 – Dec. 2026

Hanyang University

Hanyang International Winter School

Seoul, South Korea

Dec. 2025 – Jan. 2026

Long Beach City College

Associate Studies in Computer Science

Long Beach, CA

Aug. 2021 – Jun. 2023

University of California – Berkeley

Undergraduate Studies in Electrical Engineering and Computer Science

Berkeley, CA

Aug. 2020 – May. 2021

EXPERIENCE

Instructional Student Assistant | CSULB – Python, SQLite

Aug. 2025 – Present

- Designed and deployed a **SQLite**-backed tool to automate grade retrieval from **Zybooks** and synchronize records directly to Canvas, eliminating manual data entry for faculty.
- Collaborated with faculty on course logistics and independently led proctoring responsibilities.

PROJECTS

Himiko | Python, Ollama, ElevenLabs, PyTorch, Whisper, Discord

Ongoing

- Architected a modular, multi-modal AI agent that integrates with Discord, VTube Studio, and Minecraft, supporting real-time voice interaction via **Whisper** transcription and a custom **StyleTTS2** voice synthesizer.
- Designed a plugin system enabling independent modules to be added without modifying core agent logic, demonstrating strong software architecture principles; e.g. **DeepL** translation for multilingual support.

MinervaCraft | Python, JS-Pybridge, Ollama, Docker

Oct. 2024 – Mar. 2025

- Developed a multi-agent AI framework enabling autonomous real-time **Minecraft** gameplay, inspired by and contributing to the open-source MindCraft project.
- Containerized each agent using **Docker**, allowing multiple independent bots to run concurrently.
- Bridged Python inference logic with JavaScript game APIs via **JS-Pybridge**

CryptoCompliance | Python, PyTorch, Graph ML, Elliptic Dataset

May. 2026

- Led a graph-based machine learning project to classify illicit Bitcoin transactions using the Elliptic dataset, applying GNN architectures with **PyTorch**.
- Achieved strong classification performance on an imbalanced financial graph, demonstrating applied expertise in ML for real-world compliance use cases.

Minecraft: Odyssey | Kotlin, Java, PaperAPI, Blockbench

Ongoing

- Engineered a full-scale **Minecraft** expansion – comprising a server plugin, datapack, and resource pack – that adds custom items, biomes, dimensions, and dungeons while remaining compatible with vanilla clients.
- Published the plugin publicly and maintained an active server community of 40+ members; integrated the Dropbox API for seamless server-side asset delivery.

LEADERSHIP

Association for Computing Machinery – Design Lead

Aug. 2023 – May. 2024

California State University – Long Beach

Long Beach, CA

- Directed multiple design initiatives for the CS Department, including a centralized club information portal and a Discord authentication system for student and guest verification.
- Produced promotional materials and event branding for general body meetings and large-scale events.

Paul Merage Future Leaders Initiative

May. 2023 – Aug. 2023

University of California – Irvine

Irvine, CA

- Selected for a competitive leadership program focused on emerging technologies; presented capstone work to the Mayor of Irvine, an NVIDIA Vice President, and leading industry executives.
- Facilitated leadership workshops and built a cross-institutional network of peers and mentors.

TECHNICAL SKILLS

Languages: Python, Kotlin, Java, TypeScript, JavaScript, C#, C++

Frameworks: Node.js, React, Next.js, Svelte, SvelteKit, Unity

AI/ML: PyTorch, Keras, Ollama, Whisper, HuggingFace, OpenAI API, Gemini API

Developer Tools: Git, Docker, Firebase, Vercel, Blockbench, Aseprite
